7 Health Benefits of Rightway CMS Custom Orthopedic Shoes

Custom orthopedic shoes are more than just footwear—they're an investment in your mobility, comfort, and long-term foot health. At Rightway CMS, every pair is individually crafted to support your unique needs while delivering exceptional comfort, protection, and confidence with every step.

■ 1. Personalized Support for Maximum Comfort

Every Rightway CMS shoe is custom-made from your foot measurements or cast to provide precise support. This helps improve alignment, reduce pressure points, and enhance overall walking comfort.

■ 2. Advanced Diabetic Foot Protection

Our diabetic footwear is designed to reduce pressure, minimize friction, and help prevent ulcers and skin breakdown. Soft linings, protective construction, and customized insoles promote healthier feet for people living with diabetes.

■ 3. Relieves Foot & Heel Pain

Whether you experience plantar fasciitis, arthritis, bunions, heel pain, or metatarsalgia, our custom footwear evenly distributes pressure to reduce pain and improve daily mobility.

■ 4. Improves Balance & Stability

Custom orthopedic shoes provide enhanced stability and better foot positioning, helping reduce the risk of slips and falls while improving confidence during everyday activities.

■ 5. Accommodates Foot Deformities

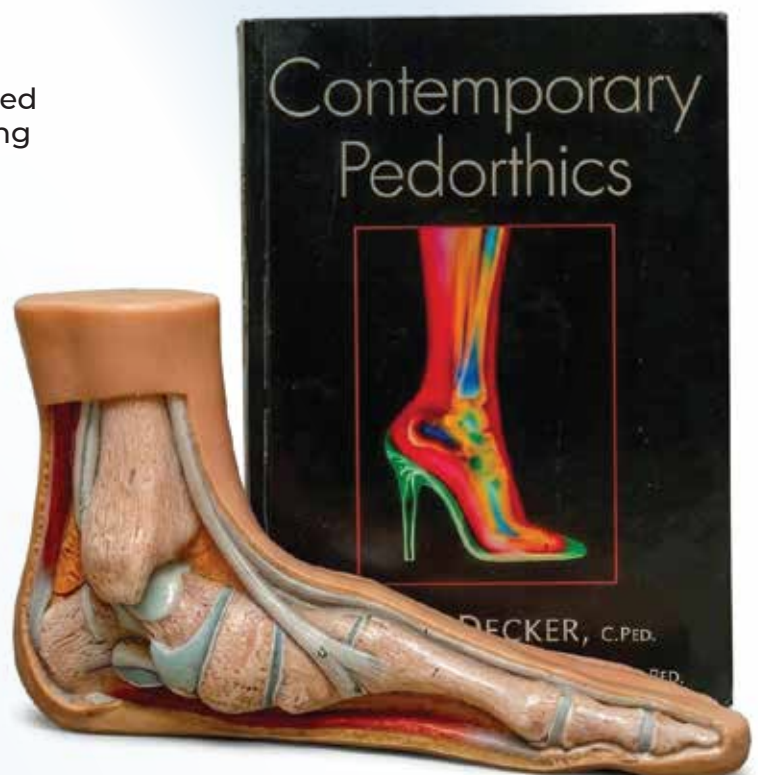

Rightway CMS footwear is designed to comfortably accommodate bunions, hammertoes, Charcot foot, amputations, swelling, and other complex foot conditions without compromising comfort or protection.

■ 6. Helps Prevent Future Foot Complications

Properly fitted orthopedic footwear can reduce excessive pressure and abnormal movement, helping prevent injuries, ulcers, joint stress, and costly medical treatments in the future.

■ 7. Restores Confidence & Everyday Mobility

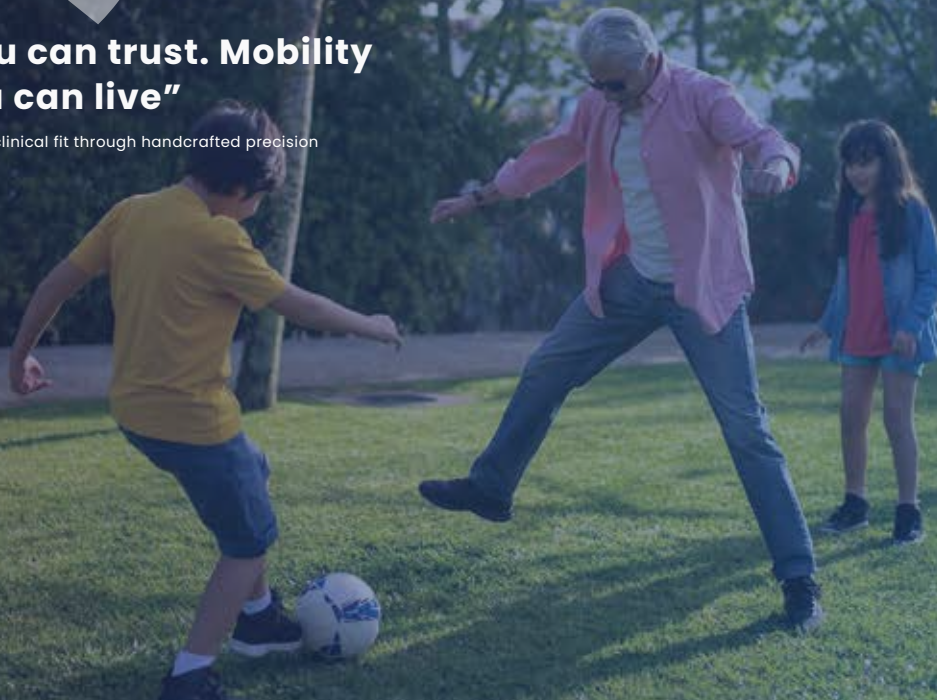

When your feet feel supported and pain-free, staying active becomes easier. Rightway CMS custom orthopedic shoes help you walk farther, stand longer, and enjoy a healthier, more active lifestyle.

**"Precision you can trust. Mobility
you can live"**

Experience the perfect clinical fit through handcrafted precision

WHO WE ARE

Since 2005, Rightway Custom Molded Shoes has specialized in designing and manufacturing high-quality, handmade custom footwear for practitioners and their patients. Using premium U.S. sourced materials, we produce durable, long-lasting shoes tailored precisely to each orthopedist's prescription and the patient's unique clinical needs.

Our footwear is designed to help treat and prevent excessive pronation, chronic wounds, and future foot pain.

Our Mission

To improve mobility and quality of life by crafting the most reliable and thoughtfully engineered custom orthopedic footwear, combining clinical precision, craftsmanship, and continuous innovation.

Our Vision

To become the most trusted and technically advanced provider of custom orthopedic footwear in the United States, and a leader in lower-limb orthotic solutions worldwide.

Core Values

Patient First –

Every decision begins with the question: does this improve the patient's mobility, comfort, or health?

Excellence in Craft –

Orthopedic footwear must be precise, durable, and clinically sound.

Integrity and Trust –

We operate with honesty and transparency with clinicians, patients, partners, and employees.

Continuous Improvement –

We constantly refine our processes, technology, and knowledge.

Innovation and Advancement –

We explore new materials, technologies, and clinical methods to remain at the frontier of orthopedic footwear.

Lean and Operational Discipline –

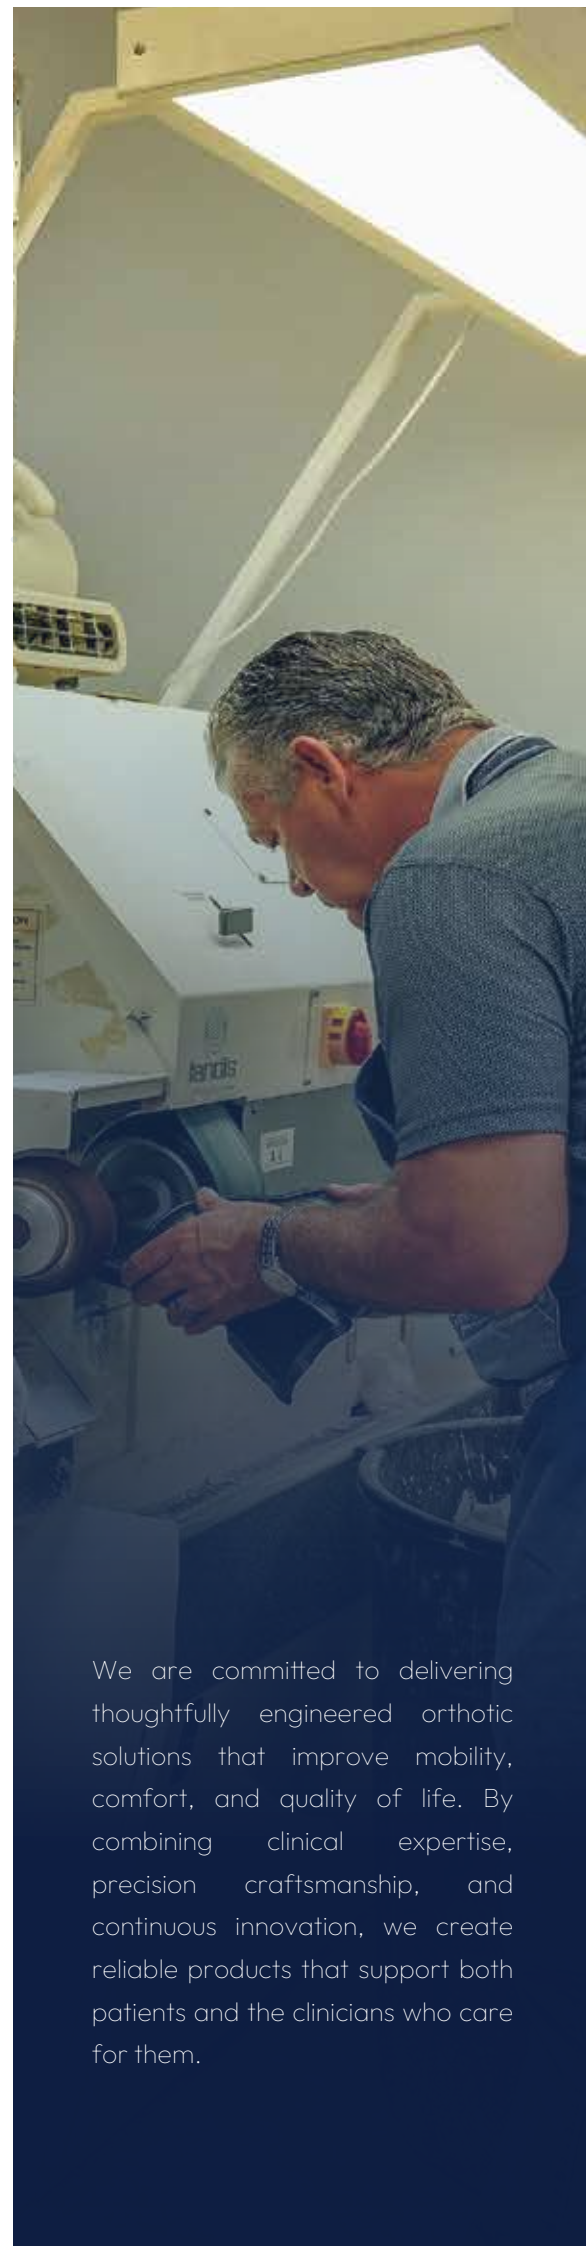

We strive to do more with less while maintaining uncompromising quality.

Shared Prosperity –

We aim to create value for patients, clinicians, employees, and shareholders.

Accountability –

We take responsibility for our work from cast to final delivery.

We are committed to delivering thoughtfully engineered orthotic solutions that improve mobility, comfort, and quality of life. By combining clinical expertise, precision craftsmanship, and continuous innovation, we create reliable products that support both patients and the clinicians who care for them.

Precision, Quality

Your trusted custom footwear fabrication partner.

At Rightway CMS, we partner directly with podiatrists and clinics to deliver custom footwear solutions that enhance mobility, alleviate severe pain, and elevate patient care.

COMPLETE LOWER LIMB SOLUTIONS

Trusted by Practitioners Who Demand Precision, Quality & Reliability

Our fabrication process is built around one goal - your patient fits correctly on the first visit. Quality and quick turnaround, always guaranteed. Trusted by over 300 clinics across the United States.

Custom Insoles

GROW

Functional Walker

Flexible Polypropylene shell balanced under the arch and heel. Great for older patients and those with sensitive feet.

- Polypropylene Shell
- Extrinsic post + PPT Mid-Layer
- Vinyl Top Cover
- Soft EVA arch fill bottom

Functional Sport

3d thermoplastic shell ensures good control and impact absorption. Deep heel cup and extrinsic post provides rearfoot stability. Full length top cover gives extra shock absorption and prevents sliding in the shoe. Great for active patients who wear sneakers and boots.

- Thermoplastic Shell
- Extrinsic post
- Deep Heel Cup
- Sports anti shock top cover

Functional Dress

Flexible 3d printed thermoplastic shell balanced under the arch and heel. Great for older patients and those with sensitive feet.

- Carbon Fiber Composite /Thin Polypro
- Intrinsic Post
- Leather Top & Bottom Cover

(I)

(II)

Accommodative Standard

Softer accommodative orthotics which are easily modified.

Available in Bi-LAM and Tri-LAM configuration:

(i) Bi-LAM

- Topcover: Plastazote or PPT
- Base Layer: EVA, CORK or Rigid Plastazote

(ii) Tri-LAM

- Topcover: Plastazote or PPT
- Mid-layer Layer: PPT
- Base Layer: EVA, CORK or Rigid Plastazote

Rightway Toe Filler

Our skilled craftsmen combine years of experience with advanced fabrication techniques to create toe filler prostheses that promote a secure, comfortable fit. Each prosthesis is designed to help reduce patient discomfort, support a more natural gait, and provide reliable volume replacement following partial foot amputation. The material is soft enough to help protect sensitive or compromised tissue while remaining durable enough to function effectively as a filler. For the most accurate design and optimal fit, please submit the patient's footwear along with the cast.

RW TRANSMET FILLER

The prosthesis is most commonly fabricated using an EVA base with a Plastazote top cover and filler, lined with Poron to provide a combination of cushioning, support, and durability. It is designed for patients with transmetatarsal or Syme's amputations, helping to restore foot volume and improve comfort during ambulation. For the most accurate design and optimal fit, please submit the patient's footwear along with the cast for best results.

Full-contact diabetic inserts

Full-contact diabetic inserts are custom manufactured from cast or foam impressions to ensure a precise, patient-specific fit. The base layer is constructed from 35 durometer EVA to provide optimal balance and support, while the top cover features a soft 3/16" Plastazote layer for enhanced protection, pressure relief, and all-day comfort.

FEATURES

- Full contact orthoses 100% manufactured using cast, foam impression, or scan
- Base layer 35 durometer EVA for balance and support
- Top cover soft 3/16" plastazote for complete protection and comfort

Top Layer

Our custom orthotics are expertly crafted to deliver exceptional comfort, support, and long-lasting performance. Precise fabrication techniques to ensure consistent quality and reliable clinical outcomes.

BLACK LEATHER

Premium natural leather offering excellent durability, breathability, and a comfortable feel.

BROWN LEATHER

A stylish leather option providing a soft surface finish with reliable long-term wear.

BLACK VINYL

A durable, easy-to-clean synthetic cover suitable for everyday clinical use.

STS

A lightweight, high-performance top cover designed for comfort and resilience.

BLACK ANTI-SHOCK

Shock-absorbing cover material designed to enhance cushioning and impact protection.

BLUE ANTI-SHOCK

Provides additional cushioning and comfort for high-impact activities.

PLASTAZOTE

Lightweight, closed-cell foam material offering excellent pressure relief and moisture resistance.

BLUE PERFORATED

Breathable perforated material that improves airflow and moisture control.
